## SUMMARY

---

Frontend Developer with around 1 year of solid experience building responsive, visually refined web applications through self-driven and project-based work.

Focused on clean UI/UX, performance, and real-world usability; adaptable and passionate about delivering polished, impactful products while continuously growing to contribute effectively in dynamic teams.

Skilled in React, JavaScript, Tailwind CSS, and Redux, with experience integrating Appwrite and Firebase for backend functionality, as well as Generative AI using Node.js.

## EDUCATION

---

**Bachelor of Science, Data Science & Programming**, Indian Institute of Technology, Madras Expected 2025  
Relevant Coursework: Data Science, Programming.

**Bachelor of Technology, Computer Science & Communication**, Manipal University, Jaipur 2019 - 2023  
Relevant Coursework: Web Development, Data Structures and Algorithms.

## SKILLS

---

<b>Technical Skills</b>	React, JavaScript, Tailwind, Redux, Git, Appwrite, Firebase, HTML, CSS
<b>Soft Skills</b>	Problem Solving, Communication, Collaboration, TimeManagement, Lifelong Learner
<b>Development Focus</b>	UI/UX, GenAI, Responsive Design, REST APIs, Product Development & Deployment

## EXPERIENCE

---

<b>Software Engineer Intern</b> Philips	Jan 2023 - Jul 2023 Bengaluru, INDIA
--	---

- Collaborated with R&D team to refactor and improve Philips AVW15 diagnostic workstation applications.
- Developed and optimized automated test scripts using TestComplete and Selenium to enhance test reliability.
- Conducted daily CI/CD build checks and manual testing, identifying and reporting defects to maintain software quality.

## PROJECTS

---

**FlexiTasks.** Built a responsive task manager in React/Redux with animated themes, persistent state, and flexible view modes (Compact, Detailed, Custom). Implemented dynamic UI themes, Dark/Light/Colorful modes, and multiple productivity layouts (List, Kanban, Calendar, Timeline). ([Try it here](#))

**House Marketplace.** Developed a responsive real estate platform using React and Firebase, enabling users to list, edit, and explore properties for rent or sale. Implemented property filtering, separate rent/sale views, and user-driven offer features. ([Try it here](#))

**Hashnode Article Finder.** Solved a key problem for ChaiCode community by building a React-based tool using AI and frontend skills to track student articles on Hashnode. ([Try it here](#))

**AskMark.** Developed a smart bookmarking app with AI-powered tags, summaries, and tone detection. Enabled chat-based content queries, search/filter features, and multiple layouts (Grid, Cards, Headlines) for seamless user experience. ([Try it here](#))

## EXTRA-CURRICULAR ACTIVITIES

---

- Write articles on [Hashnode](#) and [Peerlist](#) focused on Generative AI, RAG techniques, and deployment strategies.
- I enjoy exploring new technology tools and products daily and share insights through my Telegram channel [DevTools Spotlight](#) and [LinkedIn](#).
